**Letter of recommendation for Sisandza Technology Services**

To Whom It May Concern:

I confirm that Sasol have dealt with Sisandza Technology Services (STS) since 2014, during which time they have provided Sasol with excellent services in the areas of protection testing, commissioning, maintenance, secondary plant design and general electrical installation services.

All of our experience during our three-year association with STS has been very positive, and to my knowledge this company has a good track record of timely and successful completion of its jobs.

I can confidently recommend STS as a solid and reliable supplier, and experts in their field.

Sincerely,

**Dr. Muzi Dlamini**  
Electrical Engineering Department  
Engineering Support Services
